PROFILE

Dynamic Senior Frontend Developer with over five years of experience in crafting high-performance web and mobile applications across diverse industries. Expertise lies in employing microfrontend architectures and leading development projects that enhance system efficiency. Proven ability to design and implement innovative solutions, including a customer journey tracking system integrating Salesforce chat. Committed to continuous growth and team management, with aspirations to develop impactful projects that drive significant results. Proficient in advanced technologies such as React, Next.js, and Node.js, ensuring the delivery of scalable and maintainable applications.

EMPLOYMENT HISTORY

Senior Frontend Developer at Grupo Boticário, Beleza na Web

August 2022

Currently serving as a Senior Frontend Developer at Grupo Boticário, focusing on developing robust web applications utilizing modern technologies. The role involves leading initiatives for an integrated portal solution tailored for sales representatives, utilizing a microfrontend architecture to enhance maintainability and scalability.

- Implemented rigorous testing strategies, including unit and end-to-end tests, to ensure the highest quality standards.
- Designed and integrated a customer journey tracking system that incorporates Salesforce chat functionalities.
- Utilized technologies such as Next.js, React.js, Node.js, and Apollo for effective application development.

Senior Mobile and Frontend Developer at Facily

April 2021 — April 2022

In the position of Senior Mobile and Frontend Developer at Facily, responsibilities included spearheading the development of products for the logistics sector using Flutter. This role emphasized the design of scalable architectures that prioritize performance optimization and effective user experiences.

- Conducted thorough process mapping and pain point analyses to guide the development strategy.
- Worked with technologies such as Angular 2 and Flutter to create high-quality mobile experiences.

Mid-level Fullstack Developer at DQR Tech (BTG Pactual), Remote

February 2021 — April 2021

- Developed microfrontend modules aligned with existing interface requirements
- Analyzed and implemented complex business rules for system modernization
- Technologies: React, Microfrontends, DevExpress

Frontend Engineer at Athos, Remote

March 2020 — January 2021

- Architected and implemented scalable solutions replacing legacy systems
- Led cross-functional team collaboration for feature development and system integration
- Developed custom client applications with focus on scalability
- Technologies: Vue, Ionic, PHP, ASP.NET, GraphQL, MongoDB

EDUCATION

Bacharelor, Universidade De Mogi das Cruzes

January 2017 — December 2020

INTERNSHIPS

Intern at Universidade De Mogi das Cruzes, Mogi Das Cruzes

July 2018 — September 2018

Maintained all university computers, cloning them via network to increase productivity and ease maintenance. Developed Java WEB applications to facilitate communication between students and teachers, such as a web application with Java and Angular 1 to inform if a professor is using a classroom.
